The Financial Markets Authority (AMF) is responsible for supervising Gay-Lussac Gestion with regard to this information document.

Gay-Lussac Gestion is approved in France under no. GP 95001 and regulated by the Financial Markets Authority (AMF).

Date of production of the DIC: 30/09/2024 - Date of update: 31/12/2024

You are about to buy a product that is not simple and may be difficult to understand.

What is this product?

Type: French-law Collective Investment Undertaking in Securities (OPCVM), established in the form of a Common Investment Fund (hereinafter the "FCP").

Product classification: International bonds and other debt securities.

Term: The FCP was established on 10 September 2024 for a term of 99 years.

Objectives: The fund's objective is to achieve performance exceeding that of SARON capitalised daily by 2%, after taking into account current fees, by gaining exposure to sovereign bonds and currency fluctuations over an investment horizon of more than three years. The share is hedged against currency risk between its currency and that of the OPCVM.

Management is implemented with a target annual volatility of between 10% and 15% under normal market conditions.

Benchmark indicator: The OPCVM uses the benchmark indicator for the purposes of calculating outperformance fees and comparing performance.

The benchmark index is SARON capitalised daily (Overnight Indexed Swap or OIS method).

The SARON rate (Swiss Average Rate Overnight) capitalised daily (Overnight Indexed Swap or OIS method) corresponds to the reference rate for the Swiss franc (CHF) interbank market: it is calculated by SIX Financial Information AG. The benchmark administrator is registered in the register of administrators and benchmark indices maintained by ESMA.

As the Fund pursues discretionary management, its performance may deviate very significantly from that of the benchmark indicator. The OPCVM's investment universe is in no way constrained by this market indicator.

Capitalisation fund reinvesting its income, eligible for life insurance contracts.

Investment strategy: The fund offers active management on sovereign bond and currency markets within an international investment framework.

In order to achieve the management objective, the management team implements strategic and tactical positions across all international sovereign bond and currency markets in both developed and emerging countries.

The selection of investment strategies is based on a "top-down" approach, and is notably based on macroeconomic analysis, capital flow analysis and relative valuation of markets.

Bond strategies are broken down into four pillars:

- overall portfolio sensitivity; active management of the portfolio's overall bond risk within a sensitivity range of between -8 and +8;
- allocation of sensitivity between different developed country bond markets;
- allocation of sensitivity between different segments of yield curves;
- allocation to emerging countries.

Currency management is also broken down into four pillars:

- strategic allocation on the US dollar: buying or selling the dollar;
- US against other developed country currencies;
- relative allocation between the three other sets of developed country currencies sharing regional or sectoral attributes (Europe, Asia, Others);
- allocation between currencies belonging to the same set;
- allocation to emerging currencies against the US dollar.

The FCP promotes social characteristics, provided that the countries in which investments are made apply good governance practices (ESG), within the meaning of Article 8 of Regulation (EU) 2019/2088 known as the "Disclosure Regulation". Social and governance criteria contribute to the fund manager's decision-making.

The UCITS will never invest more than 35% of its total assets in bonds issued by non-OECD member countries.

The UCITS will invest a maximum of 5% of its total assets in securities whose rating at the time of purchase is below B- according to the scale of at least one of the major rating agencies or deemed equivalent by the management company.

The UCITS may have exposure of up to 400% of its net assets in currencies other than the euro.

The indicative average leverage level of the UCITS is 15.

However, the UCITS will have the possibility of achieving a higher leverage level, with a maximum of 30.

Redemption of units: Subscription and redemption requests are centralized each business day before 12 noon by the depositary and are executed at unknown price, on the basis of the next net asset value calculated on closing prices of the day.

Recommended investment period: This Fund may not be suitable for investors who plan to withdraw their investment before 3 years.

Type of investors targeted: This fund unit is open to any subscriber (not open to US persons).

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and without any experience in the financial sector. It is compatible with investors who are able to bear capital losses and who do not require capital protection.

The product is compatible with clients seeking to grow their capital over a period of at least equal to the recommended minimum holding period of 3 years.

Depositary: Société Générale S.A.

Where and how to obtain more information about the UCITS or the FIA, a copy of the UCITS prospectus or description of the investment strategy and objectives of the FIA, the latest annual report and any subsequent semi-annual report of the UCITS referred to in Article 68, paragraph 1, points b) and c), of Directive 2009/65/EC, or the latest annual report can be requested at the following address: contact@gaylussacgestion.com or contact your advisor.contact@gaylussacgestion.com

What are the risks and what could this return to me?

Synthetic Risk Indicator (SRI):

!

The risk indicator assumes that you hold the product for 3 years. The synthetic risk indicator allows you to assess the risk level of this product compared to others. It indicates the probability that this product will record losses in the event of market movements or our inability to pay you.

The actual risk may be very different if you choose to exit early, and you could receive less in return. We have classified the FCP in risk class 4 out of 7, which is a medium risk class. Example of possible explanation: In other words, potential losses related to future performance of the product are at a moderate level and, if the situation were to deteriorate on the markets, our ability to pay you could be affected.

The FCP is not subject to any guarantee or protection.

The significant risk(s) for the Product not taken into account in this indicator is/are as follows:

Credit risk and interest rate risk: The Product invests in bonds, cash or other money market instruments. There is a risk that the issuer may be unable to meet its obligations. The probability that this situation occurs depends on the issuer's creditworthiness. Default risk is generally increased with bonds rated below "Investment Grade". A rise in interest rates may lead to a fall in the value of fixed income securities held by the Product. Bond prices and yields have an inverse correlation: when a bond's price falls, its yield increases.

Emerging markets risk: The mutual fund may be invested in interest rate instruments issued by emerging countries, in local currency or in international currencies, on their domestic market or on foreign markets. The mutual fund may also be exposed to currency risk from emerging countries.

These assets carry a risk generally higher than that of developed countries due to less mature and less stable economic and institutional development. The price fluctuation of these securities may have a positive or negative influence on the value of these instruments and may therefore lead to a rise or fall in the net asset value of the mutual fund.

Risk related to the use of derivative instruments: The use of derivative instruments can cause significant variations in net asset value, both upward and downward.
Currency risk: The Product invests in foreign markets. It may be affected by variations in exchange rates which may lead to a fall or increase in the value of your investment. For more information on the risks of the Product, please refer to the risks section of the prospectus.

Performance scenarios

The figures shown include all costs of the product itself, (as applicable) but not necessarily all fees due to your adviser or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive. What you will obtain from this product depends on future market performance. Future market performance is random and cannot be predicted with precision. The unfavourable, intermediate and favourable scenarios presented represent examples using the best and worst performances, as well as the average performance of the appropriate benchmark index over the last 10 years. The stress scenario shows what you could obtain in extreme market situations.

	Recommended holding period: 3 years Investment example: 10,000 CHF	If you exit after 1 year	If you exit after 3 years
Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.		
Stress scenarios	What you could get after deduction of costs	3,640 CHF	6,450 CHF
	Average annual return	-63.58%	-13.60%
Unfavourable	What you could get after deduction of costs	7,350 CHF	8,200 CHF
	Average annual return	-26.47%	-6.41%
Moderate	What you could get after deduction of costs	10,100 CHF	10,760 CHF
	Average annual return	0.99%	2.46%
Favourable	What you could get after deduction of costs	15,360 CHF	14,480 CHF
	Average annual return	53.64%	13.14%

The unfavourable scenario occurred for an investment in the benchmark index between October 2017 and March 2020. The intermediate scenario occurred for an investment in the benchmark index between February 2014 and February 2017. The favourable scenario occurred for an investment in the benchmark index between March 2020 and March 2023.

What happens if Gay-Lussac Gestion is unable to make payments?

The product is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of failure of the latter, the product's assets held by the depositary will not be affected. In the event of failure of the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What will this investment cost me?

The person who sells you this product or provides you with advice about it may ask you to pay additional costs. If this is the case, this person will inform you about these costs and show you the impact of these costs on your investment.

The tables below present the total amounts that may be deducted from your investment to cover different types of costs. These amounts depend on the amount you invest and the length of time you hold the product. The amounts shown here are illustrations based on an example investment amount and various possible investment periods.

We assumed:

- that during the first year you would recover the amount you invested (annual return of 0%). That for other holding periods, the product performs as indicated in the intermediate scenario;
- CHF 10,000 is invested.

COSTS OVER TIME

	If you exit after 1 year	If you exit after 3 years
Total costs	313 CHF	560 CHF
Impact of annual costs (*)	3.13%	1.77%

(*) It shows the extent to which costs reduce your annual return during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is expected to be 4.23% before costs are deducted and 2.46% after this deduction.

COST COMPOSITION

One-off costs on entry or exit	Impact of annual costs if you exit after 1 year.	
Entry costs	2.00% of the amount you pay when entering the investment.	200 CHF
Exit costs	0.00% of your investment before it is paid out.	0 CHF
Recurring costs charged each year		
Management fees and other administrative and operating expenses	0.75% of the value of your investment per year. This estimate is based on actual costs over the past year.	74 CHF
Transaction costs	0.40% of the value of your investment per year. This is an estimate of costs incurred when we buy and sell the underlying investments in the product. The actual amount varies depending on the quantity we buy and sell.	39 CHF
Ancillary costs charged under certain conditions		
Performance-related commissions	There is no performance-related commission for this product.	0 CHF

How long should I hold it and can I withdraw money early?

RECOMMENDED HOLDING PERIOD: Minimum 3 YEARS

This FCP may not be suitable for investors who plan to withdraw their contribution within three years. The recommended holding period is intended to minimize your risk of capital loss in the event of redemption after this period, although this does not constitute a guarantee. You may also redeem your investment at any time; your FCP does not charge any redemption fees.

How can I file a complaint?

For any complaint relating to the FCP, you can consult your advisor or contact Gay-Lussac Gestion:

- Either by mail: Gay-Lussac Gestion 45, avenue George V – 75008 PARIS
- Or directly via the website at the following address: reclamations@gaylussacgestion.com.

If, following your complaint, the response provided is not satisfactory to you, you may also contact the AMF Mediator via the following link: www.amf-france.org or write to the following address: AMF Mediator, Autorité des marchés financiers, 17 place de la Bourse, 75082 Cedex 02. www.amf-france.org

Other relevant information

When this product is used as a unit-linked support in a life insurance or capitalization contract, additional information on this contract, such as the costs of the contract, which are not included in the costs indicated in this document, the contact in case of complaint and what happens in case of failure of the insurance company are presented in the key information document of this contract which must be provided by your insurance company or broker or any other insurance intermediary in accordance with their legal obligation.

The FCP is subject to sustainability risk within the meaning of Article 8 of Regulation (EU) 2019/2088 on sustainability disclosure in the financial services sector (the "Disclosure Regulation") as defined in the risk profile of the prospectus. The management of sustainability risks is ensured by the managers as defined in section "VIII. Integration of sustainability factors in the investment strategy" of the FCP prospectus.

In accordance with Article 7 of Regulation (EU) 2020/852, the FCP being subject to Article 6 of Regulation (EU) 2019/2088: "The investments underlying this financial product do not take into account the European Union criteria for environmentally sustainable economic activities".

Depositary: Société Générale S.A.
